POPULAR PROGRAMS

Available for In-Person Presentations, Virtual Presentations, Keynotes, Breakout Sessions, General Sessions, Workshops (half day & full day)

Inclusive Input Yields Inclusive Design:
Diversity, Equity, Inclusion, & Access in Design

From LEGO to Living Room Design:
The Stuff & Spaces of (Real) Family Life

Data-Driven Design:
Leveraging People Research in the Design Process

Learn how to get good data to inform your current and future designs by asking the right people the right questions in the right setting and at the right time. Become an expert at incorporating diversity, equity, inclusion, and access into your data-gathering and design processes, yielding more socially sustainable designs.

Home designs and family lives affect each other. Explore connections between residential design and the realities of today's families and neighborhoods, with up-to-date social science research findings and compelling stories that situate people's style and lifestyle preferences within a larger social and historical picture.

Journey through key points in the design process using data about how people actually live their lives. From research question formulation to data collection, analysis, and sharing, this program outlines the needed steps and methodological insights for a data-driven and design thinking approach to design and building.
